

Post Deep Peel care

Patient information

Generally: Do not scratch, do not moist or remove or peel away the yellow powder.
Contact your doctor for any question, any doubt.

Day 0 -1: At home, apply YELLSKREEN powder if it becomes wet.
Take a painkiller tablet, if necessary (afternoon and/or before sleep).

Day 3: See your doctor, he will apply vaseline on the edges of the treated area and control your skin.

Day 6: See your doctor, he will apply vaseline on the whole area to help the crust to fall off.
Make up allowed.

Day 8-15 : **Protective home care**
1- Cleanse the skin, using « Skin Tech Cleanser » only.
2- Apply « IPLASE Mask » 3 x/day, it helps to reduce redness.

After Day 15: Specific Home Care
1- Cleanse the skin, using « Skin Tech Cleanser » only.
2- Anti ageing cream: Atrofillin (refills dermis, tenses the skin, uniformizes skin colour).
3- Pigment control: « Blending Bleaching cream » Morning and evening.

Sun Protection:

Days 1 to 15: avoid any sun exposure and use Melablock-HSP SPF 50+ (9am, 12am, 3 pm).

Days 15 to 180: Be careful with sun exposure and use Melablock-HSP, SPF 30 (9am, 12am, 3 pm).
